

Meeting Notes

Summary

The meeting focused on reviewing the current progress of the project and identifying key challenges in the development process. It was decided that the clustering would only be applied when distinct topics are detected, otherwise the system would proceed directly with.

Key Points

- - The meeting focused on reviewing the current progress of the project and identifying key challenges in the development process.
- - It was decided that the clustering would only be applied when distinct topics are detected, otherwise the system would proceed directly with.
